## M800 Inkjet Pritner

Select messages either by number or name See the message you are printing in full and print as you see it on the LCD screen.

The new **MPS** WINJET software Create your messages on your own PC using WINJET the ever so easy to use software program.

Create your messages, add logos, create real time barcodes, write in any language text, then store and save the messages in your own PC and WINJET software.

Download to the M800 controller at your convenience. Safeguard all your messages in your own computer .

The new iKonMac M800 Using the M800 full QWERTY keypad an operator can add external text, lot and batch numbers to the existing messages with out needing to change the message through a PC.

In the WINJET software program all everyday printing requirements are already included. If you want anything that's not on the program, just ask us.

Constant upgrades and up dates are available via our web site and free of charge to you from the day you purchase the first controller with an access key.

The new **MPS** M800 additional features  
Need to change the printing requirement?

Need to change line, need to add a printing head from 1, 2, 3, 4, 5, 6, 7, or 8 heads No problem, no need to change or alter the M800 controller just plug in the new ink stations and GO.

Need to change ink colour?  
Need to change ink types oil or solvent?  
Just swop over the ink station plug and print. Want to several different colours on the product its no problem now.

The new **MPS** M800  
The M800 controller, showing the 2x outputs to the ink stations. Photocell and encoder sockets RS, LAN and USB ports, WIFI is under development.

The M800 is a highly sophisticated printing system but with the power of WINJET Software, it is simple and easy to operate.
